A.2.a.	ISSUE OR DEFECT WHICH THIS MCCP / OCCP SEEKS TO ADDRESS
	Required under Market Code Parts 8.7.1 (ii) (b) and 8.8.1 (ii) (b)

The purpose of this MCCP is to capture final refinements to the Market Code and Code Subsidiary Documents (CSDs), required as a consequence of the development of the March 2019 Release and to consolidate the required Market Code and CSD changes which have already been captured in the Approved Changes that form the scope of that Release. The MCCP also picks up inconsistencies and or gaps identified from previously Approved Changes.

A.2.b.	DESCRIPTION OF THE NATURE AND PURPOSE OF THE MCCP / OCCP AND HOW IT MEETS THE MARKET CODE / OPERATIONAL CODE OBJECTIVES AND PRINCIPLES FOR THE MARKET DOCUMENTS
	Required under Market Code Parts 8.7.1 (ii) (c) and 8.8.1 (ii) (c)

General Description

The Market Code and CSD changes proposed in this MCCP are required as a natural consequence of developing the Approved Changes for the March 2019 Release. In particular, not implementing this change would leave gaps in the Market Code and/or CSDs. However, it should be noted that the changes described in this MCCP are to ensure that the intent of the Approved Changes that are pertinent to the March 2019 Release are fully reflected in the Market Code and CSDs.

A.2.d. DRAFT LEGAL TEXT Required under Market Code Parts 8.7.1 (ii) (d) and 8.8.1 (ii) (d)

The purpose of this MCCP is to consolidate those changes being made to the Market Code and Code Subsidiary Documents arising from the March 2019 Release. In addition, the proposal includes minor refinements which have not already been captured in MCCPs.

The additional changes are:

- Market Code – Section 6.2.10 has been reverted to its pre-MCCP234 status, re-establishing the original timescales for performance related remedial reporting by Trading Parties – at the end of the month following the relevant Performance Measures, rather than the end of the second month after the Performance Measures, since CMACPx186 has removed the need for the work-round of late running of the Performance Measures.

- Market Code – Definitions. Current terminology in CSD0101 for the notional Live RV and default Live RV have now been defined, as these terms are defined in the Wholesale Scheme of Charges.

- CSD0101 – The CSD has been further updated to reflect that 'notional Live RV' and 'default Live RV' are now defined terms.

- CSD0002 – The CSD has been further updated to reflect the change of title for the R6 Performance Measures to 'SPID Status Updates', to be consistent with the requirements of MCCP227-CC. Measure R11A has also been updated to clarify that the R11 measure is run in August, reporting failures with the July Performance Measures.

- CSD0301 – The CSD has been further updated to reflect:

  o Corrections; The D2045 and D2046 Data Items should be re-named (replacing 'Landlord' with 'MT').

  o Existing Error Codes should be modified as follows;

Existing Error Code	Modified Error Message
DX	SS SPID is associated with a WS SPID that is not PDISC or DEREG.
DU	MT SPID must be provided when the MT SPID Flag is True.
EH	SPID must not have an associated Water SPID when specifying an MT SPID.
EK	MT SPID must exist in the CMA CS.
EL	MT SPID must be Tradeable or TDISC.
EM	MT SPID must be a Water SPID.
ES	MT SPID must have an SAA Reference Number Absence Code of MT.
EV	MT SPID must not be provided when the MT SPID Flag is False.
FE	MT SPIDs must not be unmeasurable.
FY	MT SPID Flag must be included and set to True when specifying an MT SPID.
KX	MT SPID must not be DEREG
KW	MT SPID must not be PDSIC.
FL	For Future Use.
FU	For Future Use.

- CSD0301 Annex – The Annex contains raw XML from the CMA CS code. This is generated directly from the code once the new version of the code is accepted by the CMA. Additionally, this Annex has been updated to include HVI operational configuration options, most of which are already in place, but also includes two additional aspects of configuration; the batch size limitation and the elapsed time for polling when zero MIDs are returned, as described in CMACP273.
