

CMA Bulletin

To: CMA MEMBERS
No: BU101
Title: Termination of SWW Vacant Site Incentive Scheme Application workaround
Purpose: For Action
Expiry date: n/a
Attachment: n/a
From: Neil Cohen, CMA
Date: 25th March 2014

The SWW Vacant Site Incentive Scheme requires that a Licensed Provider submitting an application to Scottish Water for Supply Points associated with a premise to be flagged as occupied, rather than vacant, needs the Licensed Provider responsible for the premises to be identified. Prior to the March 2014 Release, the CMA needed to be involved to provide this information. However, the Market Dataset (which is available via the LVI and the ftp) now includes the LP responsible for a Supply Point and the CMA's involvement is therefore redundant.

This Bulletin is to inform Market Participants that the CMA workaround carried out on behalf of Licensed Providers in relation to Scottish Water's Vacant Site Incentive Scheme will terminate at close of business on Monday 31st March 2014. Applications received after this date will not be processed and the expectation is that a Licensed Provider will then be able to submit a Vacant Site Incentive Scheme Application directly to Scottish Water.

Scottish Water requires that a Licensed Provider submitting a Vacant Site Incentive Scheme Application to them (on or after 1st April 2014) should copy such an application to the Licensed Provider responsible for the Supply Point(s) in question, where different from the applicant. Any queries regarding the process to be followed after 1st April 2014 should be sent directly to Scottish Water.
