1. Purpose and scope

1.1 Introduction

The Market Code provides a Cancellation Window following the Registration Confirmation Date, during which either an Incoming or an Outgoing Licensed Provider may cancel a Registration. The grounds for Cancellation are set out in Sections 5.6.1 and 5.6.2 of the Market Code. For the avoidance of doubt, each Licensed Provider shall be responsible for ensuring that it has appropriate grounds for issuing a Cancellation. All Cancellations will be subject to the provisions of CSD 0002 (Performance Standards). The CMA will issue market reports from time to time on the volumes of Cancellations and Licensed Providers may be requested to provide information on their Cancellation activity to the CMA.

Cancellations outside the Cancellation Window pursuant to Section 5.6.3 of the Market Code are out with the scope of this document and are dealt with in CSD 0105 (Error Rectification & Retrospective Amendments).

1.2 Scope

This CSD documents the process by which a Cancellation is implemented in the Central Systems and the consequences arising from a Cancellation. This is an Additional Service for which the CMA may apply an Additional Service Charge to the Licensed Provider issuing the Cancellation Request. Where a SPID Registered to a Self-Supplier is erroneously Registered by another Licensed Provider, the CMA will apply the Additional Service Charge to that Incoming Licensed Provider.

2. Cancel Registration

2.1 Process Description

The Cancellation process shall be undertaken in the event that:

- An Incoming Licensed Provider wishes to prevent its Registration; or
- An Outgoing Licensed Provider wishes to prevent the Transfer to the Incoming Licensed Provider, or
- An Outgoing Licensed Provider has submitted a Disconnection Request for the Supply Point to be temporarily disconnected, in accordance with the Disconnections Code and such Disconnection Request has not been cancelled and has not yet been executed and notified to the CMA.

2.1.1 Description of the Process Diagram steps

This Section should be read in conjunction with the Process Diagram in Section 2.2 and the Interface and Timetable Requirements in Section 2.3. The 'step' and 'decision' references appear to the bottom left of each step or decision symbol in the Process Diagram. References shown thus [T010.0] relate to the associated Data Transaction, as set out in the Data Transaction Catalogue.

Step a: Licensed Provider submits Cancellation Request [T010.0, T010.1]

During the Cancellation Window, where any of the grounds set out in Section 5.6.1 of the Market Code apply, an Incoming Licensed Provider must submit a Cancellation Request using Data Transaction T010.0 (Registration Cancellation). Where any of the grounds set out in Section 5.6.2(a) of the Market Code apply, an Outgoing Licensed Provider must submit a Cancellation Request using Data Transaction T010.0 (Registration Cancellation). Where any of the grounds set out in Section 5.6.2(b) of the Market Code are met, an Outgoing Licensed Provider may submit a Cancellation Request using Data Transaction T010.1 (Registration Cancellation). The relevant Cancellation code shall be included in all Cancellation Requests. Licensed Providers should refer to Section 3 of the CSD 0301 (Data Transaction Catalogue) for a full list of Cancellation codes.

The Outgoing Licensed Provider is also required to provide a more detailed explanation behind the included cancellation code within 24 hours of the rejection by the Outgoing Licensed Provider. If this is for an outstanding debt, a standard summary table of information

should be provided by email to the CMA within 24 hours of the rejection from the incumbent LP. This table should include the following as a minimum:

SPID	
Reason for transfer rejection	
Date of invoice in dispute	
Total outstanding amount on account	
Original due date of invoice	
Date reminder sent	
New due date specified in reminder	

Decision b: CMA validates Cancellation Request

The CMA shall ensure that the Cancellation Request has (i) been submitted by the relevant Incoming Licensed Provider or Outgoing Licensed Provider; (ii) is within the Cancellation Window; and (iii) contains a Cancellation code as set out in CSD0301- the Data Transaction Catalogue.

Step c: CMA Rejects an invalid Cancellation Request [T009.0]

If the Cancellation Request does not comply with the requirements described at decision b above, the CMA shall reject it and notify the Licensed Provider which submitted the request, using Data Transaction T009.0. Such notification will be issued within 1 Business Day of receipt of the Cancellation Request by the CMA.

Step d: CMA accepts Cancellation Request and implements Cancellation

If the Cancellation Request complies with the requirements described at decision b above, the CMA shall accept the Cancellation Request.

The CMA shall implement the Cancellation by ensuring that the Registration in respect of the Incoming Licensed Provider is cancelled and the Outgoing Licensed Provider's Registration is reinstated without interruption.

Step e: CMA notifies the Licensed Providers of the Cancellation

Within 1 Business Day of implementation of the Cancellation at step d above, the CMA shall notify the Incoming Licensed Provider of the Cancellation using Data Transaction T011.0 (Notify Registration Cancellation) and the Outgoing Licensed Provider using Data Transaction T011.1 (Notify Registration Cancellation).

The relevant Licensed Providers should be aware that the consequences of a Cancellation are as follows:

- i. The Incoming Licensed Provider's Registration will be cancelled and have no effect at the relevant Supply Point.
- ii. The Outgoing Licensed Provider's Registration will be reinstated without interruption.

Each of the relevant Licensed Providers shall take such steps as may be necessary to ensure that their internal records are updated accordingly as soon as practicable to reflect the Cancellation.

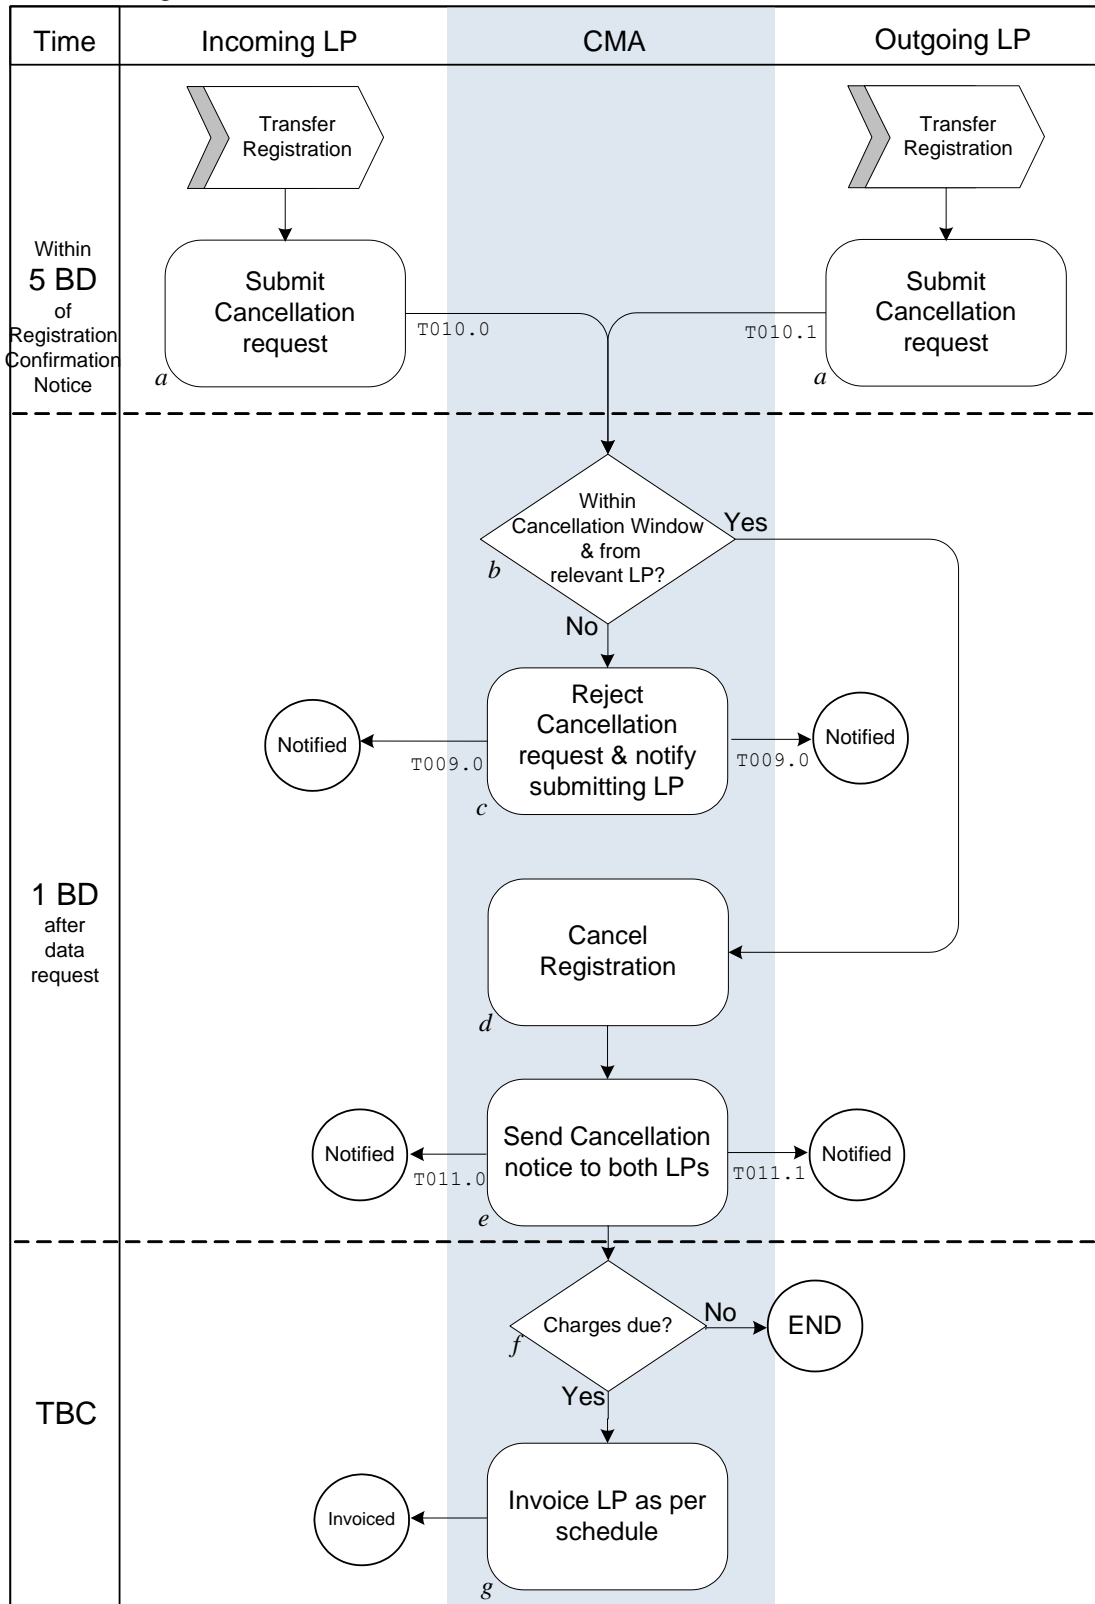

Decision f, Step g: CMA raises Additional Service Charge:

The CMA shall invoice the Licensed Provider which submitted the Cancellation Request in respect of any applicable Additional Service Charge. Alternatively, where the Cancellation Request was issued by a Self Supplier following an erroneous Transfer Registration Application by another Licensed Provider, the CMA shall submit the invoice for the Additional Service Charge to that Incoming Licensed Provider.

Appendix 1 – Process Diagram Symbols

Symbol	Name	Details
	Step	An action step. It appears in the “swimlane” of the party responsible for performing the action.
	Decision	A decisive question rather than an action. Followed by Yes or No, or occasionally WS (Water Service) or SS (Sewerage Service) the process splits depending on the answer to the question in the decision diamond.
	To another process	A flow in, or input to, another documented process
	From another process	A flow in, or output from another documented process.
	To and from another process	Used where a process is embedded within another. At this point, go to the embedded process chart before returning to the one in which it is embedded.
	End	Used after a decision diamond, generally to mean “do nothing” as it is the end of the process.
	Advised/Invoiced	Used after a process step to show “passive” action on the part of a data flow receiver e.g. to represent “Advised” or “Invoiced”
<i>g</i>	Step/Decision reference	An alphabetic reference beside each step and decision. This reference appears on the table in each section to facilitate reading the table against the process flowcharts.
T005.2	Data Transaction reference	Reference to the data transaction occurring as an output from the step it appears next to.
