1. Purpose and Scope

This document describes how the CMA will produce the Settlement Timetable and describes the content of the Settlement Reports that the CMA will produce in any Year.

2. Settlement Timetable and Reporting Description

2.1 Provision of the Settlement Timetable for each Year

The CMA will provide a Settlement Timetable to all Trading Parties and Scottish Water 30 Business Days prior to the first Settlement Run (P1) of each Year. This timetable will detail the calendar dates on which the CMA will issue the Settlement Reports to Trading Parties in any Year. The various Settlements Reports that the CMA will produce are described as P1, R1, R2, R3 and RF (which is further explained later in this document).

Appendix 1 contains an example Settlement Timetable for the Year 01/04/2008 to 31/03/2009.

2.2 Provision of the Scottish Water Data

Scottish Water will provide the CMA with the Scottish Water Data at least 20 Business Days prior to the first Settlement Run (P1) of any Year.

The CMA will make available the Scottish Water Data in order that all market participants can satisfy themselves as to its accuracy.

2.3 Deleted in Version 1.2

2.4 Settlement Run Types

The CMA will calculate the relevant Wholesale Charges payable by each Licensed Provider in respect of each Settlement Day by performing the Settlement Runs. The CMA will perform four Settlement Runs for each Settlement Day: P1, R1, R2 and R3 and will perform the Tariff Year Settlement Run (RF) once for each Year. The CMA will report each of these Settlement Runs as follows:

- P1 the preliminary Settlement Run(s), the Settlement Reports for which will be issued 16 Business Days before the Invoice Period in which the Settlement Day falls;
- R1 the first Settlement Run(s), the Settlement Reports for which will be issued 2 Business Days after the end of the Invoice Period in which the Settlement Day falls;
- R2 the second Settlement Run(s), the Settlement Reports for which will be issued 2 months after the end of the Invoice Period in which the Settlement Day falls;
- R3 the third Settlement Run(s), the Settlement Reports for which will be issued 8 months after the end of the Invoice Period in which the Settlement Day falls; and

RF – the, Tariff Year Settlement Run, the Settlement Reports for which will be issued
 5 BD after the last third Settlement Run (R3) is reported for any Year.

2.4.1 Settlement Day Based Settlement Runs (P1, R1, R2 and R3)

The CMA will capture any changes to the Registration and Volume data of a Supply Point in each Settlement Run (P1, R1, R2 and R3) for a given Settlement Day. The report data generated by the CMA in respect of each Supply Point through each Settlement Run will therefore become progressively more accurate.

In Settlement Run P1, the CMA will calculate a forecast of the Wholesale Charges that will be payable by each Licensed Provider in respect of each Supply Point registered to it on the relevant Settlement Day.

The CMA's calculations during R1 Settlement Runs will factor in all data submitted to it relating to any changes to a Supply Point's SPID Data and/or Trading Data during the relevant Invoice Period.

The CMA's calculations during R2 Settlement Runs will factor in all new SPID Data and Trading Data submitted to it since Settlement Run R1 (particularly Meter Reads that are performed on a monthly basis).

The CMA's calculations during R3 Settlement Runs will factor in all new SPID Data and Trading Data submitted to it since Settlement Run R2 (particularly Meter Reads that are performed on a bi-annual basis).

The CMA may perform further ad hoc settlement runs, as required in accordance with the Market Code.

2.4.2 Tariff Year Settlement Run (RF)

The CMA will perform the RF Settlement Run 5 BD after reporting of the last R3 Settlement Run for any Year. The CMA's calculations during this Settlement Run will factor in the Actual Weighted Average Unit Rate for each Supply Point to calculate the Wholesale Charges that should have been payable by each Licensed Provider over the relevant Year for volumetric charges. Further detail on this process is provided in CSD0205 (Charge Calculation, Allocation and Aggregation).

2.5 Settlement Report Content

2.5.1 Settlement Day Based Settlement Report (P1, R1, R2 and R3)

The Settlement Report will comprise an aggregated Settlement Report ("the Aggregated Settlement Report") and a disaggregated Settlement Report ("the Disaggregated Settlement Report"). The Aggregated Settlement Report will provide aggregated Settlement Day charges payable in each respective Invoice Period. Each Aggregated Settlement Report will contain the following information:

- The Volume supplied by the Licensed Provider for each of the different volumetric Service Elements which it provided during the relevant Invoice Period;
- The volumetric charges payable by the Licensed Provider for each of the different volumetric Service Elements which it provided during the relevant Invoice Period;
- The total number of Settlement Days Registered for each of the different nonvolumetric Service Elements which it provided during the relevant Invoice Period;
- The non-volumetric charges payable by the Licensed Provider for each of the different non-volumetric Service Elements which it provided during the relevant Invoice Period;
- The Volume supplied by the Licensed Provider for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period;
- The total number of Settlement Days Registered for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period; and
- The Trade Effluent Charge payable by the Licensed Provider for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period.

The detail of the Aggregated Settlement Report is set out in Appendix 2.

The Disaggregated Settlement Report provides wholesale charging information at Service Element level. For each LP, the Disaggregated Settlement Report will contain the relevant information in respect of the SPIDs for which they are the registered LP. For Scottish Water, the Disaggregated Settlement Report will contain the relevant information in respect of every SPID, but the identity of the LP will be removed.

2.5.2 Tariff Year Settlement Report (RF)

The Settlement Report will provide aggregated Settlement Day charges payable in each respective Invoice Period. The RF Settlement Report will contain the following information:

- The Volume supplied by the Licensed Provider for each of the different volumetric Service Elements which it provided during the relevant Invoice Period;
- The volumetric charges payable by the Licensed Provider for each of the different volumetric Service Elements which it provided during the relevant Invoice Period;
- The total number of Settlement Days Registered for each of the different nonvolumetric Service Elements which it provided during the relevant Invoice Period;

- The non-volumetric charges payable by the Licensed Provider for each of the different non-volumetric Service Elements which it provided during the relevant Invoice Period;
- The Volume supplied by the Licensed Provider for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period;
- The total number of Settlement Days Registered for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period; and
- The Trade Effluent Charge payable by the Licensed Provider for Trade Effluent Service to a Discharge Point which it provided during the relevant Invoice Period.

Settlement Timetable

Updated 09 Feb 09

4. Interface and Timetable Requirements

| Step Ref | When | Requirement | From | То | Information |
|-------------|---|---|------|------------|---|
| 1.1 | At least 30 Business Days prior to Settlement Run P1 run for the relevant Year | Provide Settlement Reports Timetable to all Licensed Providers and SW | СМА | LPs; SW | Settlement Reports Timetable for all Settlement Reports to be provided in the forthcoming Year. |
| 1.2 | At least 20 Business Days before Settlement Run P1 of the relevant Year | Scottish Water to provide the Scottish Water Data to the CMA for the relevant Year | SW | СМА | Scottish Water Data provided and made available to the Licensed Providers. |
| 1.3 | As specified in the Settlement Reports Timetable. | Regular Settlement Runs. P1 – Preliminary R1 – Run 1 R2 – Run 2 R3 – Run 3 | СМА | SW; LPs | Settlement Reports |
| 1.4 | As specified in the Settlement Reports Timetable. | RF Settlement Run | СМА | SW, LPs | Settlement Reports |

Appendix 1: Example Settlement Timetable

The following timetable has been created assuming the ongoing position, with the Financial Year running from 01/04/08 to 31/03/09 and Invoice Periods being calendar months.

| Settlement Type | |
|-----------------|--|
| P1 | Preliminary Run (reported each Invoice Period, Monthly) 16 BD prior |
| | to the start of the month |
| R1 | Run 1, reported monthly 2 BD after the end of the Invoice Month |
| R2 | Run 2, reported monthly 2 months after Run 1 for the Invoice Month |
| R3 | Run 3 reported monthly 6 months after Run 2 for the Invoice Month |
| RF | Final Run, Reported 5 Business Days after the last R3 Report for the |
| | Tariff Year (run once each Year) |

Appendix 2: Aggregated Settlement Report

This appendix sets out the format and detailed content of the Settlement Report for the Settlement Runs (P1-R3):

- Section APP 2.1 defines the Comma Separated Variable record layout by the use of an example report;
- Section APP 2.2 defines the various header and trailer records contained within a file; and
- Sections APP 2.3 to APP 2.7 provide a description of the data and its numerical derivation.

APP 2.1: Record Layout

The output file is a CSV with four columns and is structured as follows:

- Each file has 5 header rows shown in the example below as H1=>H5. The date format in H4 is as shown in the example;
- There is a separate block of rows for each Licensed Provider
- The block for each Licensed Provider commences with three header rows shown in the example below as LPH1=>LPH3;
- Water and Sewerage charges are shown in repeating blocks. The rows SE1, SE2 and SE3 are always at the start of each block. Service Elements are listed in the rows SE4a=>Se4z. These rows are data driven. For instance if there is no 15mm meter then there is no 15mm meter row. The block ends with a sub-total line SE5;
- Trade Effluent is shown in a unique block. The rows TE1, TE2 and TE3 are always at the start of the block. Each DPID is specifically listed in rows TE4a=>Te4z. These rows are data driven to provide a row for each DPID. The block ends with a sub-total line TE5;
- The block for each Licensed Provider ends with two trailer rows shown in the example below as LPT1 and LPTH2.

Note: It is a matter of fact that some of the text fields have trailing spaces (for example in row H4, column 1 below). Also, some of the numeric fields have more than two decimal places (for example in the rows SE5 and TE5 below).

For the avoidance of doubt, the total charges in pence are shown in the header line row LPH3, column 2. In every other line which shows a charge, whether it is a detail line (SE4a, SE4b... SE4z, TE4a, TE4b... TE4z) or a subtotal line (SE5 or TE5), the charges in pence are shown in column 4.

Negative values can occur in respect of both volumes and charges. They are shown using a minus sign ("-").

APP 2.2: Header and Generic Data Items

| Report Header | |
|----------------------|--|
| Туре: | States which Settlement Run Type has been performed, as defined in CSD0201. |
| Tariff Year: | States the Financial Year which the Settlement Report belongs to and quotes the calendar year in which it begins. |
| Invoice Period (IP): | Provides the numerical value and date range that apply for that IP. This is a calendar month. |
| Scheduled Run Date: | The date that the Settlement Report was produced. This occurs at the beginning of the clock day (i.e. occurs before the start of the Business day if run on a Business Day). |
| Gap Line: | Provided before the first LP |
| Header for Each LP | |
| LP: | The name of the Licensed Provider who's Charges follow. |
| Gap Line: | Provided after the LP name |
| LPH3 Total Charge | The total charge for the LP named in the header. Includes all Service Elements relating to Water, Sewerage and Trade Effluent. |
| LPH3Total Volume | The total volume associated to both Water and Sewerage Service Volumetric Charges. It excludes Trade Effluent Volume |
| Trailer for each LP | |
| Gap Line: | Provided before the "End LP" |
| End LP | The name of the LP that has been reported in the detailed lines above. |

APP 2.3: Water Volumetric Charges

These exclude the fixed charge based elements of meter based charges. SPIDs subject to Transitional charges will appear twice; once for the physical based Chargeable Meter Size (CMS) and once for the Rateable Value based CMS.

| Service Elements | The column labelled Service Element provides the level of Reporting in Aggregate for each "Chargeable Meter Size" (CMS) that has been notified or derived. Meter, 20mm Re-assessed and Unmeasureable CMS are reported separately. Unmeasureable CMS includes all RV derived Supply Points (i.e. Unmeasureable and Transition Arrangement SPIDs). |
|---------------------------------|--|
| Number of registered days | The Number of registered days describes how many days the LP has been registered to each SPID that is aggregated for the Service Element being reported. This value is unaffected by the Vacancy or Temporary Disconnected status. It is also unaffected by any Transition percentage that is being applied. There are two counts for Transition SPIDs with meters, the physical based CMS and the RV based CMS (reported as an Unmeasureable Service Element e.g. 20mm Unmeasurable). |
| Volume (m ³) | The volume reported is the volume associated to either the meter, Pseudo Meter or the RV (for Unmeasureable CMS). It is the sum of Daily Volumes for each day the LP is registered to each SPID summed up for that Service Element CMS. The volume figure is calculated as follows: Transition Volume (meter): full volume based on meter reads; Transition Volume (RV): full volume based on RV calculations; Schedule 3, 29e or SEES Exempt Customers: full volume ; Vacant: based on the last Meter Advance; and Temporary Disconnection: the volume for the period spanning a temporary disconnection is set to zero. |
| Charge (pence) | The charge displayed is the Volumetric Charge associated to each SPID that falls under the Service Element CMS for the LP (the sum for all SPIDs under that CMS). The charge is calculated as follows: Transition Charge (meter and RV): the relevant % discount to the full charge is applied; Schedule 3, 29e: the relevant % discount to the full charge is applied; SEES (Exempt Customers): no charge, apply proportion of the SEES Credit to each of the Service Elements for this SPID; Vacant: zero charge for the period spanning the vacancy; and Temporary Disconnection: zero charge for the period spanning the temporary disconnection. |

APP 2.4: Water Non-Volumetric Charges

SPIDs subject to Transitional charges will appear twice; once for the physical based Chargeable Meter Size (CMS) and once for the Rateable Value based CMS.

| Service Elements | The column labelled Service Element provides the level of Reporting in Aggregate for each "Chargeable Meter Size" (CMS), including 20mm Re-assessed, that has been notified or derived. In addition, other types of Service Elements are also provided here for Miscellaneous Water Services (this includes Outside Taps and Field Troughs for both Farms and Crofts). Meter and Unmeasureable CMS are reported separately. Unmeasureable CMS includes all RV derived Supply Points (i.e. Unmeasureable and Transition Arrangement SPIDs). |
|---------------------------------|---|
| Number of registered days | The Number of Registered Days describes how many days the LP has been registered to each SPID that is aggregated for the Service Element being reported. This applies regardless of whether the SPID is registered as Vacant, Temporary Disconnected or whether a Transition percentage is being applied. There are two counts for Transition SPIDs with meters, the physical based CMS and the RV based CMS. |
| Charge (pence) | The charge displayed is the fixed charge associated to each SPID that falls under the Service Element (CMS or Miscellaneous Service type) for the LP (the sum for all SPIDs under that Service Element). The charge is calculated as follows: |
| | Transition Charge (meter and RV): the relevant % discount to the full charge is applied; |
| | Schedule 3, 29e: the relevant % discount to the full charge is applied; |
| | SEES (Exempt Customers): no charge, apply proportion of the SEES credit to each of the Service Elements for this SPID; |
| | Vacant: zero charge for period they are vacant; and |
| | Temporary Disconnection: fixed charges are unaffected by temporary disconnection. |

APP 2.5: Sewerage Volumetric Charges

These exclude the fixed charge based elements of sewerage meter based charges. SPIDs subject to Transitional charges will appear twice; once for the physical based Chargeable Meter Size (CMS) and once for the Rateable Value based CMS.

| Service Elements | The column labelled Service Element provides the level of Reporting in Aggregate for each Sewerage "Chargeable Meter Size" (CMS) that has been notified or derived. Meter, 20mm Re-assessed and Unmeasureable CMS are reported separately. Unmeasureable CMS includes all RV derived Supply Points (i.e. Unmeasureable and Transition Arrangement SPIDs). |
|---------------------------------|--|
| Number of registered days | The Number of Registered Days describes how many days the LP has been registered to each SPID that is aggregated for the Service Element being reported. Regardless of whether the SPID is registered as Vacant, Temporary Disconnected or a Transition percentage is being applied. There are two counts for Transition SPIDs with meters, the physical based CMS and the RV based CMS. |
| | Return to Sewer allowance is zero and/or a Non Domestic Allowance exists for Trade Effluent. |
| Volume (m ³) | The volume is either a) the volume associated to the meter, Pseudo Meter or the RV (for Unmeasureable CMS) adjusted for the Non-Return to Sewer allowance or b) the Non Domestic Allowance (NDA) where the SPID has associated Trade Effluent Discharge Point(s). It is the sum of Daily Volumes for each day the LP is registered to each SPID summed up for that Service Element CMS. The volume figure is calculated as follows: Transition Volume (meter): full volume based on meter reads; Transition Volume (RV): full volume based on RV calculations; Schedule 3, 29e or SEES Exempt Customers: full volume Vacant: based on the last Meter Advance; and Temporary Disconnection: the volume for the any period spanning a temporary disconnection is set to zero. |
| Charge (pence) | The charge displayed is the charge associated to each SPID that falls under the Service Element CMS for the LP (the sum for all SPIDs under that CMS). The charge is calculated as follows: Transition Charge (meter and RV): the relevant % discount is applied to the full charge; Schedule 3, 29e: the relevant % discount is applied to the full charge; SEES (Exempt Customers): no charge, apply proportion of the SEES Credit to each of the Service Elements for this SPID; Vacant: zero charge is applied for period of the vacancy; and Temporary Disconnection: zero charge is applied for the period of temporary disconnection. |

APP 2.6: Sewerage Non-Volumetric Charges

SPIDs subject to Transitional charges will appear twice; once for the physical based Chargeable Meter Size (CMS) and once for the Rateable Value based CMS.

| Service Elements | The column labelled Service Element provides the level of Reporting in Aggregate for each Sewerage "Chargeable Meter Size" (CMS), including 20mm Re-assessed, that has been notified or derived. In addition, other types of Service Elements are also provided here for Miscellaneous Sewerage Services (Property Drainage, Road Drainage and Caravans). Meter and Unmeasureable CMS are reported separately. Unmeasureable CMS includes all RV derived Supply Points (i.e. Unmeasureable and Transition Arrangement SPIDs). |
|---------------------------------|--|
| Number of registered days | The Number of Registered Days describes how many days the LP has been registered to each SPID that is aggregated for the Service Element being reported. Regardless of whether the SPID is registered as Vacant, Temporary Disconnected or a Transition percentage is being applied. There are two Counts for Transition SPIDs with meters, the physical based CMS and the RV Based CMS. |
| | Note: Where the Non-Return to Sewerage Allowance (NRSA) is set to zero, the SPID will not be counted. However, where there is a Trade Effluent Non Domestic Allowance associated to a meter then registered days are counted because there will be a volume that over rides any zero NRSA on the meter |
| Charge (pence) | The charge displayed is the charge associated to each SPID that falls under the Service Element (CMS or Miscellaneous service type) for the LP (the sum for all SPIDs under that Service Element). The charge is calculated as follows: |
| | Transition Charge (meter and RV): the relevant % discount to the full charge is applied; |
| | Schedule 3, 29e: the relevant % discount to the full charge is applied; |
| | SEES (Exempt Customers): no charge, apply proportion of the SEES credit to each of the Service Elements for this SPID; |
| | Vacant: zero charge is applied for vacant periods; and |
| | Temporary Disconnection: fixed charges are unaffected by temporary disconnection. |

APP 2.7: Trade Effluent Charges

| Service Elements | The column labelled Service Element provides Discharge Point (DPID) level reporting. |
|-----------------------------|---|
| Number of registered days | The Number of Registered Days describes how many days the LP has been registered to each DPID for the Invoice Period. |
| Volume (m ³) | The volume is the Daily Actual Volume Discharged (DAVD) for the period or the last DAVD used as an estimate where a TE Volume submission does not cover the period. |
| Charge (pence) | The charge displayed is the charge associated to each DPID. The percentage discount will be applied to DPIDs with Schedule 3 arrangements on them. |
