2. MCCP/OCCP DETAILS						
a.	ISSUE or DEFECT WHICH THIS MCCP/OCCP SEEKS TO ADDRESS					
<p>As part of the work of the Commission's Trade Effluent Stakeholder Workshops, several minor changes are needed to the Operational Code to reflect changes being made to the market.</p> <p>Process 22 will be modified to incorporate Scottish Water providing 45 day non-binding decisions on trade effluent consent applications. Licensed Providers will be given the opportunity to provide additional information to Scottish Water after receiving the decision. Scottish Water is already providing non-binding indicative decisions, and this OCCP is just updating the Operational Code to reflect current practice.</p> <p>The purpose and scope of Process 23 will be updated to reflect that Licensed Providers may enter into an agreement with Scottish Water to undertake trade effluent sampling and analysis. The steps of this process will not be changing.</p>
