**A.2. M CCP / OCCP DETAILS**

**A.2.a. ISSUE OR DEFECT WHICH THIS M CCP / OCCP SEEKS TO ADDRESS  
Required under Market Code Parts 8.7.1 (ii) (b) and 8.8.1 (ii) (b)**

This proposal is one of a sequence of M CCPs that have been put forward from time to time by the CMA, as part of an ongoing review of CSD drafting. The issues that are generally considered as part of this ongoing review are:

- Ease of interpretation of the CSD by Parties,
- Ability of Parties to identify where changes may be required within a CSD, either for a change specifically to that CSD, or for a consequential change arising from changes to other CSDs and the Market Code and
- Ease of consolidating changes to the CSD by the CMA, as part of the bi-annual Release project process.

The above review has highlighted that the current CSD that might benefit most from some form of re-drafting is CSD0104.

This CSD has been subject to a relatively large number of changes since market opening and includes large numbers of distinct, but related, processes. For many of these processes, there is a good deal of duplicated text, but often the style and layout of these differ from place to place within the document.

**A.2.b. DESCRIPTION OF THE NATURE AND PURPOSE OF THE M CCP / OCCP AND HOW IT MEETS THE MARKET CODE / OPERATIONAL CODE OBJECTIVES AND PRINCIPLES FOR THE MARKET DOCUMENTS  
Required under Market Code Parts 8.7.1 (ii) (c) and 8.8.1 (ii) (c)**

**General Description**

This proposal seeks to re-draft CSD0104 and in so doing, deliver the following benefits:

- Improve the separation of different areas of data update, in particular by differentiating between the SPID level data updates and the Meter related data updates, by creating a Part 1 and a Part 2 of the CSD.
- Remove duplication; for example, by identifying common process elements, where this is applicable.
- Improve consistency of style and layout

It should be noted that this proposal is solely associated with editorial changes and no changes to the underlying processes and obligations are proposed, with one exception. One additional change has been incorporated, to recognise that Scottish Water may also update the new data item; the D2044 RV Transition Flag (which has been added to the T012.7 transaction and the associated T012.8 notification, as part of the Live RV changes originally covered under M CCP214 – CC and also in M CCP219 Feb CSD Drafting.

A.3.a. PROPOSED IMPLEMENTATION DATE OR LEAD TIME  
Timescale must not overlap with the period of consultation with the Commission and should take account of the impacts identified in Section A.2.c. Any quoted lead time should commence from date of Approval.

January 2018.

A.3.b. ANY LIMITATIONS OR DEPENDENCIES FOR IMPLEMENTATION

The one non-editorial change to CSD0104 is required to take effect in February 2018, along with the Live RV changes (MCCP214 – CC and MCCP219) and delivering this update in parallel to these changes avoids the need to update the current drafting and then update to the new style.

A.4. ANY OTHER COMMENTS

The change to incorporate SW's ability to update the D2044 RV Transition Flag, being the only non-editorial change, has been highlighted in red.
