A.1.g. PROPOSED URGENCY NON-URGENT

A.1.h. REASONS FOR URGENCY

The CMA CEO will review this information and make a decision as to whether to take this MCCP / OCCP forward as urgent as defined under Market Code Part 8.9.1

A.2. MCCP / OCCP DETAILS		
A.2.a. ISSUE OR DEFECT WHICH THIS MCCP / OCCP SEEKS TO ADDRESS Required under Market Code Parts 8.7.1 (ii) (b) and 8.8.1 (ii) (b)		
<p>The purpose of this MCCP is to capture final refinements to the Market Code and Code Subsidiary Documents (CSDs), required as a consequence of the development of the March 2025 Release, and to consolidate the required Market Code and CSD changes which have already been described in the Approved Changes that form the scope of that Release. The MCCP also picks up inconsistencies and/or gaps identified from previously Approved Changes.</p>		
A.2.b. DESCRIPTION OF THE NATURE AND PURPOSE OF THE MCCP / OCCP AND HOW IT MEETS THE MARKET CODE / OPERATIONAL CODE OBJECTIVES AND PRINCIPLES FOR THE MARKET DOCUMENTS Required under Market Code Parts 8.7.1 (ii) (c) and 8.8.1 (ii) (c)		
General Description		
<p>The following are the additional changes:</p> <p>CSD0104 Part 1 Maintain SPID Data</p> <p>MCCP305 would allow LPs to update a Customer Name on any SPID that is not Permanently Disconnected or Deregistered. In reviewing the detail of the T032.0 transaction, we have concluded that Rejected SPIDs also need to be excluded so the change to the wording of CSD0104 Part 1, Section 6.3 has been extended to specify that the LP will update the Customer Name at a “Supply Point that is not Rejected, Deregistered or Permanently Disconnected”.</p> <p>CSD0203 Meter Read Submission Validation</p> <p>When the validation rejection for positive Candidate Daily Volume following a negative or zero Prior Estimated Daily Volume was removed by MCCP274, the rejection was removed from the table in Section 2.3.1 but was not replaced with a statement that the read had therefore passed validation. A new entry in the table clarifies this together with a new note to clarify that a read that passes Section 2.3.1 can still be rejected by the next check set out in Section 2.3.2.</p> <p>CSD0301 Data Transaction Catalogue.</p> <ul style="list-style-type: none"> • Definition of error codes for future-dated transactions. • GJ error code is introduced to provide a more accurate description of the rejection of a T012.7 transaction with an Effective From Date before 1/1/1980 • XA error code is retained because it was identified as redundant in error in MCCP306. • EJ error code description is expanded to “SPID status must not be; REJ, PDISC or DREG” as a consequence of the change to CSD0104 Part 1 set out above

B.2.d. CUSTOMER IMPACT (TO BE COMPLETED BY LPS)

There is no customer impact as a result of this change, however the customer impacts associated with delivery of MCC303, 305, 306, 308 and 311 as part of this change are noted below:

MCCP303 / 311: LPS would be able to maintain their normal billing cycles without the risk and cost associated with of having to rebill many Customers (and the associated likely increase in the number of Customer contacts). The savings to LPS would then be available to offer as discounts to Customers against the default charges.

MCCP305: The accuracy of information held about Customers in the MDS will improve.

MCCP306: No direct impact on Customers but streamlines CMA and Trading Party systems encouraging ongoing efficiency in serving Customers.

MCCP308: These changes:

- improve the accuracy of settlement and billing
- incentivise Scottish Water and LPS to improve performance
- provide a business case for Scottish Water and LPS investing in their systems which will allow improved customer service and faster issue resolution
